- a module housing having an axial extent, first and second end portions, a central bore formed along said axial extent, and a wedge-like recess integrally formed in said second end portion;

- a visible laser diode (VLD) mounted along said bore at said first end portion of said module housing, for producing a laser beam generally along said axial extent;

- a focusing lens mounted along said bore between said first and second end portions, for focusing said laser beam to a predetermined focal point;

- and a laser beam expansion element mounted within said wedge-like recess at said second end portion of said module housing, and expanding said laser beam along
